

NEWS RELEASE**Sine Wave dv/dt Filter for Any Submersible Motors**

February 23, 2009

Milwaukee, WI - Arteche PQ, Inc., a leading manufacturer of equipment to improve electrical power quality for facilities or adjustable speed drive systems, expanded their offering of Sine Wave dv/dt filters. Arteche now offers filters that accomplish both dv/dt and sine wave filtering for virtually any submersible motor. The typical applications include municipal water pumping, wastewater facilities, methane gas production, oil production, agricultural irrigation systems, and recreational water systems. A new catalog includes standard ratings up to 690 volt motors for various PWM carrier frequencies. When required, Arteche can supply medium voltage filters (for 2300 and 4160 volt motors) as well as filters for any desired PWM carrier frequency.

Filters are available in any type of enclosure, on open panels or in kit form for convenient use by OEMs and system integrators.
